

An Internship Report on

*(Title of the Semester Internship Program) Submitted in
accordance with the requirement for the degree of*

Under the Faculty Guideship of

(Name of the Faculty Guide)

Department of

(Name of the College)

Submitted by:

(Name of the Student)

Reg.No: _____

Department of _____

(Name of the College)

Instructions to Students

Please read the detailed Guidelines on Internship hosted on the website of AP State Council of Higher Education <https://apsche.ap.gov.in>

1. It is mandatory for all the students to complete a Semester internship either in V Semester or in VI Semester.
2. Every student should identify the organization for internship in consultation with the College Principal/the authorized person nominated by the Principal.
3. Report to the intern organization as per the schedule given by the College. You must make your own arrangements for transportation to reach the organization.
4. You should maintain punctuality in attending the internship. Daily attendance is compulsory.
5. You are expected to learn about the organization, policies, procedures, and processes by interacting with the people working in the organization and by consulting the supervisor attached to the interns.
6. While you are attending the internship, follow the rules and regulations of the intern organization.
7. While in the intern organization, always wear your College Identity Card.
8. If your College has a prescribed dress as uniform, wear the uniform daily, as you attend to your assigned duties.
9. You will be assigned a Faculty Guide from your College. He/She will be creating a WhatsApp group with your fellow interns. Post your daily activity done and/or any difficulty you encounter during the internship.
10. Identify five or more learning objectives in consultation with your Faculty Guide. These learning objectives can address:
 - a. Data and Information you are expected to collect about the organization and/or industry.
 - b. Job Skills you are expected to acquire.
 - c. Development of professional competencies that lead to future career success.
11. Practice professional communication skills with team members, co-interns, and your supervisor. This includes expressing thoughts and ideas effectively through oral, written, and non-verbal communication, and utilizing listening skills.
12. Be aware of the communication culture in your work environment. Follow up and communicate regularly with your supervisor to provide updates on your progress with work assignments.

13. Never be hesitant to ask questions to make sure you fully understand what you need to do your work and to contribute to the organization.
14. Be regular in filling up your Program Book. It shall be filled up in your own handwriting. Add additional sheets wherever necessary.
15. At the end of internship, you shall be evaluated by your Supervisor of the intern organization.
16. There shall also be evaluation at the end of the internship by the Faculty Guide and the Principal.
17. Do not meddle with the instruments/equipment you work with.
18. Ensure that you do not cause any disturbance to the regular activities of the intern organization.
19. Be cordial but not too intimate with the employees of the intern organization and your fellow interns.
20. You should understand that during the internship programme, you are the ambassador of your College, and your behavior during the internship programme is of utmost importance.
21. If you are involved in any discipline related issues, you will be withdrawn from the internship programme immediately and disciplinary action shall be initiated.
22. Do not forget to keep up your family pride and prestige of your College.

_____<<@>>_____

Student's Declaration

I, _____ a _____ student _____ of
_____ Program, _____ Reg. No.
_____ of the Department of
_____ College do hereby declare that I have
completed the mandatory internship from
_____ to _____ in _____ (Name of
the intern organization) under the Faculty Guideship of
_____ (Name of the Faculty Guide), Department of

_____ (Name of the College)

(Signature and Date)

Official Certification

This is to certify that _____ (*Name of the student*) Reg. No. _____ has completed his/her Internship in _____ (*Name of the Intern Organization*) on _____ (*Title of the Internship*) under my supervision as a part of partial fulfillment of the requirement for the Degree of _____ in the Department of _____ (*Name of the College*).

This is accepted for evaluation.

(Signatory with Date and Seal)

Endorsements

Faculty Guide

Head of the Department

Principal

Certificate from Intern Organization

This is to certify that_____ (*Name of the intern*) Reg. _____ No_____ of _____ (*Name of the College*) underwent internship in _____ (*Name of the Intern Organization*) from _____ to _____

The overall performance of the intern during his/her internship is found to be _____ (*Satisfactory/Not Satisfactory*).

Authorized Signatory with Date and Seal

ACKNOWLEDGMENTS

I feel immense pleasure in expressing my heartfelt thanks to everyone who has been part of this project. Their blessings and unwavering support have been invaluable. I am truly grateful for the encouragement and assistance I have received throughout this journey.

I would like to express my sincere gratitude to Sri/Smt **(Principal Name)** the principal of **(College Name)** for their constant blessings and encouragement during the course of my internship.

My thanks also go to the Head of Department, Sri **(HOD Name)** Sir/Madam, and all the other faculty members for their continuous support, guidance, and timely suggestions.

And Special thanks to the Internship Mentor **(Mentor/Guide Name)** Sir/Madam.

I extend my sincere thanks to **Mr. Manohar Yerra**, Sir, the GMO & Internship Incharge of OTP Technologies Pvt Ltd, for their cooperation and guidance throughout this experience. And Special thanks to the Internship trainer **P. v. s. soma sekhar** for the valuable guidance.

I am deeply grateful to **Mr. G. Hari Babu**, Sir, C.E.O. of OTP Technologies Pvt Ltd. I would also like to thank the entire team at OTP Technologies Pvt. Ltd. for their constant guidance during my internship.

Finally, I owe my sincere thanks to my parents, family, mentors, and friends for their unwavering encouragement and support throughout this internship journey.

CHAPTER 1

EXECUTIVE SUMMARY

The internship report shall have a brief executive summary. It shall include five or more Learning Objectives and Outcomes achieved, a brief description of the sector of business and intern organization and summary of all the activities done by the intern during the period.

1. Explore career alternatives prior to graduation.
2. Integrate theory and practice.
3. Assess interests and abilities in their field of study.
4. Learn to appreciate work and its function in the economy.
5. Develop work habits and attitudes necessary for job success.
6. Develop communication, interpersonal and other critical skills in the job interview process.
7. Build a record of work experience.
8. Acquire employment contacts leading directly to a full-time job following graduation from college.
9. Identify, write down, and carry out performance objectives (mutually agreed upon by the employer, the MCC experiential learning supervisor, and the student) related to their job assignment.

Academic Learning Objectives

Application of concepts or theories of your major and your liberal arts education and/or development of new knowledge and understanding. Examples:

1. Learn and understand the methods involved in researching legislation for committee assignments.
2. Analyze political theories used in campaign planning.
3. Apply the principles of accounting to tax preparation.

Professional Learning Objectives

Skill development related to your major or an occupation; and/or general skills such as oral and written communication, critical thinking, organization, problem solving, decision making, leadership, interpersonal relationships, technical, etc.

Examples:

1. Collaborate with a remote team on projects while also working independently over the semester on a deliverable.
2. Learn to administer and interpret personality inventories.
3. Learn and understand the logistics and components of event planning by creating a how to manual for a regional event.

Personal Learning Objectives

Personal development such as self-awareness, self-confidence, sensitivity and appreciation for diversity, clarification of work and personal values, Career and Post Graduate Development.

Examples:

1. Determine if working for an accounting firm is an appropriate career goal for me.
2. Develop my potential as a facilitator in group counseling.
3. Familiarize myself with trade groups and associations and learn their code of ethics and read trade periodicals.

CHAPTER 2

OVERVIEW OF THE ORGANIZATION

Suggestive contents

- A. Introduction of the Organization**
- B. Vision, Mission, and Values of the Organization**
- C. Policy of the Organization, in relation to the intern role**
- D. Organizational Structure**
- E. Roles and responsibilities of the employees in which the intern is placed.**
- F. Performance of the Organization in terms of turnover, profits, market reach and market value.**
- G. Future Plans of the Organization.**

Introduction

OTP Technologies Pvt.Ltd., IT Process Private Limited, is a company incorporated under the companies Act 2021 (21 of 2021).OTP Technologies Pvt.Ltd., Process governs many constraints in the arena of education and employment. With the aspect of providing qualified service to the clients and students.

Vision

We focus on developing and nurturing deep, long-term relationships with clients and candidates because strong relationships lead in exchanging the best ideas and informed options with broad access to the most talented leaders.

Mission

We carefully identify candidates with “Right Personnel and Right Attitude” from our recruitment network and database to fulfill your expectations and requirements.

Value of the organization

OTP Technologies Pvt.Ltd., is the pioneer of organised recruitment . Our roots in Management consulting enables us to bring a unique approach to recruitment.

Organizational structure

Company Details of OTP TECHNOLOGIES PVT.LTD.,

- ❖ CIN Number : U72900AP2021PTC118898
- ❖ Company Name : OTP Technologies Pvt.Ltd.,
- ❖ Current Company Status (for efilng) : Active
- ❖ ROC Where Company is Registered : ROC-VIJAYAWADA
- ❖ State : Andhra Pradesh
- ❖ Company Registration Number : 118898
- ❖ Company Category : Company limited by Shares
- ❖ Company Sub Category : Non-govt company
- ❖ Class of Company : Private
- ❖ Date of Incorporation : 21-July-2021
- ❖ Age of The Company : 2 Year(s)+
- ❖ Number of Members(Applicable in case of company without Share Capital) : Un-Reported
- ❖ Main Business Activity Detail :

Other business activities n.e.c., It Comes Under Division Computer and related activities and this come under section real estate,renting and business activities

CHAPTER 3

INTERNSHIP PART

Description of the Activities/Responsibilities in the Intern Organization during Internship. which shall include details of working conditions, weekly work schedule, equipment used, and tasks performed. This part could end by reflecting on what kind of skills the intern acquired

Working Conditions

1. The internship was conducted in a hybrid (online/offline) mode with flexible learning schedules.
2. Participants worked five days a week (Monday to Friday), dedicating 2–3 hours daily to live sessions, assignments, and project work.
3. Interns used tools like **Python, Anaconda environment, and vs code** for python practice.
4. A supportive environment was maintained, with regular mentor check-ins and peer discussion channels.
5. Weekly assessments, quizzes, and progress reviews were conducted to ensure continuous improvement.
6. Interns were encouraged to build mini projects and document their development journey.

Weekly Work Schedule

Topic

- 1: Introduction to Machine Learning and python: Introduction about machine learning, introduction to python, Basics, Input/Output, Variables, Data types, Type Casting, Operators, Decision-Making Statements: if, elif, else, Nested Conditions, Iterative Statements: while, for, range, break, continue, pass, Sequence data types: lists, tuples, sets, dictionary, functions, file handling, modules and packages

2: Introduction to Advanced Python Concepts: Numpy, Pandas, Matplotlib.

3: Introduction to Machine learning workflow: Data, types of data, data collection, data understanding, data cleaning.

4: Model Building: Classification and regression, clustering and recommendation.

5: Model evaluation: Accuracy metrics, confusion matrix and rmse values .

ACTIVITY LOG FOR THE FIRST WEEK

Day & Date	Brief description of the daily activity	Learning outcome	Peron In-charge Signature
Day-1	Orientation of the program	Understand the structure and objectives of the internship program.Familiarize yourself with the Machine learning terminologies and expectations for the duration of the program.	
Day-2	Python Introduction & Setup	Introduction to Python. installation of python. Familiarize yourself with different environments. basic syntax of python hello world program and input output functions	
Day-3	Data Types & Variables	Python keywords, data types, built-in functions, variables, basic programs on data types	
Day-4	Type Casting in python	Type conversion and type casting and comments in python	
Day-5	Operators in python	Arithmetic, Assignment, Comparison, logical, membership, identity, bitwise operators hands-on	
Day -6	Conditional Statements	Writing if, elif, else, programs and nested if programs	

WEEKLY REPORT FOR THE FIRST WEEK

Objective Of the Activity Done: To build a strong foundation in Python programming by understanding basic syntax, data types, control structures, and functions required for further Machine Learning concepts.

Detailed Report: During the first week, we focused on building a strong foundation in Python programming. Basic concepts such as variables, data types, conditional statements, loops, and functions were covered. Students practiced writing simple programs to improve logical thinking and problem-solving skills. This week ensured that all participants were comfortable with Python, which is essential for further Machine Learning tasks.

Conclusion:

By the end of the week, students gained confidence in writing basic Python programs and developed logical thinking skills necessary for data processing and algorithm implementation.

ACTIVITY LOG FOR THE SECOND WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In- charge Signature
Day-1	Loops (for, while)	Loop-based programs like sum of numbers, factorial, iteration for using range function and transfer statements like pass, continue, break	
Day-2	Sequence data	Python provides a efficient high level data structures like lists, tuples, sets and dictionary	
Day-3	Sequence data and strings	Continued sets and dictionary And hands on examples for data structures. Strings and string modules like converting string formats to upper or lower cases etc..	
Day-4	Functions & list comprehension	Introduction to functions in python and return value along multiple return values and lambda function and list comprehension for easy list operations	
Day-5	File handling	Introduction to file handling like reading, writing, appending to a file or from a file. And file handling methods for better handling	
Day-6	Modules and packages and classes	Introduction to modules in python like in built modules and packages and installable packages using pip.	

WEEKLY REPORT FOR THE SECOND WEEK

Objective Of the Activity Done: To enhance programming skills by learning advanced Python concepts such as file handling, exception handling, and efficient coding techniques.

Detailed Report: In the second week, participants deepened their understanding of python programming by solving structured problems involving loops and conditions. They implemented logic such as sum of digits, armstrong numbers, factorials, and prime number checking to strengthen iterative concepts.

Midweek, the transition to sequence data types as lists, tuples, sets and dictionary as they are efficient high-level data structures for python and each has its own features like lists are mutable and indexed, tuples are immutable and indexed, sets are unique and not ordered, and dictionary is for key and value pairs.

Functions are introduced for better programming and efficient code as functions are used to run the code when called with parameters like arbitrary arguments and keyword arguments. A lambda function is an anonymous function which has no name.

During this week, we explored advanced Python concepts that are useful for data handling and processing. Topics such as file handling, exception handling, list comprehensions, lambda functions, and modules were introduced. Students learned how to read and process data from files and write efficient code. This helped in preparing them for working with real-world datasets.

Conclusion:

Students were able to handle files, manage errors, and write optimized code, which prepared them for working with real-world datasets

ACTIVITY LOG FOR THE THIRD WEEK

Day & Date	Brief description of the daily activity	Learning outcome	Person In-charge signature
Day-1	Advanced python concepts (Numpy)	Introduction to numpy and basic numpy functions, arrays in numpy.	
Day-2	Numpy reshaping, matrix operations	Reshaping, numpy zeros and ones and zero dimensional arrays, data types in numpy	
Day-3	Pandas	Introduction to Pandas for structured data like series and data frames, selection of data,	
Day-4	Pandas reading csv files and excel sheets	reading csv files and excel sheets	
Day-5	Visualization	Introduction to matplotlib and using python to display a graphs like bar, hist and pie charts, scatter plots and heatmaps	
Day-6	Introduction to machine learning.	Introduction to machine learning and types of machine learning and work flow for machine learning.	

WEEKLY REPORT FOR THE THIRD WEEK

Objective Of the Activity Done: To introduce basic tools for numerical computation and data handling using NumPy and Pandas, matplotlib.

Detailed Report: This week focused on advanced python concepts like numpy, pandas, matplotlib and data collection techniques for machine learning and also learnt different data types like structured, semi structured and unstructured data.

This week provided a basic introduction to NumPy and Pandas. Students learned how to create arrays using NumPy and perform simple operations such as indexing and arithmetic calculations. In Pandas, they were introduced to DataFrames and learned how to read datasets from CSV files and view basic information. The focus was kept minimal to ensure understanding without going into advanced topics.

They learnt visualising the data using matplotlib like bar plot, histogram, boxplot, pie chart, scatter plot.

They learnt different data types for machine learning like structured, semi structured and unstructured data.

They also learnt four data types in machine learning like nominal, ordinal, interval and ratio.

Conclusion:

Interns gained confidence in Numpy, pandas and matplotlib. Students understood how to represent and manipulate data using arrays and DataFrames, enabling them to load and inspect datasets efficiently. Students were able to create basic visualizations and understand patterns, trends, and dataset characteristics, forming a base for further analysis.

ACTIVITY LOG FOR THE FOURTH WEEK

Day & Date	Brief description of the daily activity	Learning outcome	Person In-charge signature
Day-1	Introduction to data	Data and its importance for machine learning. And types of data useful for machine learning like structured, semi structured and unstructured data	
Day-2	Introduction to data collection and understanding	Data collection and types of data collection and introduction to kaggle for collecting datasets and implementing operations using pandas for csv and json for .json formats	
Day-3	Data cleaning	Introduction to main part of machine learning and very important as data cleaning will effect the model building	
Day-4	Concepts involved in data cleaning	Removing na values, duplicates, string manipulation	
Day-5	Continued data cleaning	Dummy variable creation, binning	
Day-6	Model building	Machine learning types like supervised and unsupervised machine learning. Introduction to supervised machine learning. Model selection and splitting data for train and test. Evaluation metrics.	

WEEKLY REPORT FOR THE FOURTH WEEK

Objective of the Activity Done: To develop the ability to interpret data through visualization and understand dataset structure for problem identification.

Detailed Report: Week 4 introduced data cleaning techniques which is a crucial part of machine learning and an important step.

During this week, students were introduced to how emphasis was given to understanding datasets, including identifying columns, data types, and patterns. Students also learned how to define a problem statement based on the dataset, which is an important step in Machine Learning.

This was the core week focusing on data cleaning and preprocessing. Students learned how to handle missing values, remove duplicate records, and correct inconsistent data. Techniques such as encoding categorical variables and feature scaling were introduced. Outlier detection and handling were also discussed. This week emphasized the importance of preparing clean and structured data before applying Machine Learning algorithms.

Conclusion:

Students understood the importance of data quality and gained practical skills in cleaning and preprocessing datasets before applying Machine Learning models.

ACTIVITY LOG FOR THE FIFTH WEEK

Day & Date	Brief description of the daily activity	Learning outcome	Person In-charge Signature
Day-1	Introduction to knn	Introduction to classifications and k nearest neighbour and model building and evaluation.	
Day-2	Introduction to naive bayes	Introduction to naive bayes classifier and model building and evaluation.	
Day-3	Regression	Introduction to regression techniques	
Day-4	Linear regression	Simple linear regression where $y=mx+c$	
Day-5	Multiple linear regression	Introduction to multiple features affecting y	
Day-6	Evaluation metrics for classification and regression	Introduction to confusion matrix, accuracy and rmse values and error metrics	

WEEKLY REPORT FOR THE FIFTH WEEK

Objective Of The Activity Done: To introduce Machine Learning concepts and basic algorithms such as regression, classification, and simple model evaluation techniques

Detailed Report: During this week, students were introduced to the basics of Machine Learning and its workflow. They learned about training and testing data, model building, and evaluation. Simple algorithms such as Linear Regression, Multiple Linear Regression, K-Nearest Neighbors (KNN), and Naive Bayes were introduced with easy examples. The focus was on understanding concepts rather than complex implementation.

Conclusion:

Students developed an understanding of how Machine Learning models are built and used for prediction and classification tasks with simple examples.

ACTIVITY LOG FOR THE SIXTH WEEK

Day & Date	Brief description of the daily activity	Learning outcome	Person In-charge Signature
Day-1	Introduction to unsupervised learning	Unsupervised learning where output is unknown and there is no output variable	
Day-2	Clustering	Introduction to clustering techniques k-means	
Day-3	Recommendation system	Unsupervised concept recommendation system for recommended like movies, books	
Day-4	Project Selection	Choose problem and dataset	
Day-5	Data Cleaning	Prepare dataset	
Day-6	Model Building	Apply ML algorithm	

WEEKLY REPORT FOR THE SIXTH WEEK

Objective Of The Activity Done: To introduce Machine Learning concepts and basic algorithms such as clustering, recommendation system.

Detailed Report: During this week, students were introduced to the concepts of **unsupervised learning** and its importance in analyzing data without predefined labels. They learned how patterns and relationships can be discovered automatically from data. Clustering techniques such as K-Means were introduced to group similar data points based on their characteristics. Students practiced simple examples like grouping students based on marks or customers based on purchasing behavior to understand how clustering works in real-world scenarios.

In addition, students were introduced to basic **recommendation systems**, where the goal is to suggest relevant items to users based on similarity. Simple concepts such as content-based filtering and similarity comparison were explained using easy examples like movie or product recommendations. The focus was on understanding how systems identify similar users or items and generate recommendations accordingly.

Overall, this week emphasized conceptual understanding of unsupervised learning techniques, helping students recognize how clustering and recommendation systems are used in practical applications without relying on labeled data.

Conclusion:

Students developed an understanding of how Machine Learning models are built and used for clustering and segmentation tasks with simple examples.

ACTIVITY LOG FOR THE SEVENTH WEEK

Day & Date	Brief description of the daily activity	Learning outcome	Person In-charge Signature
Day-1	Model Testing	Evaluate performance	
Day-2	Final Output	Generate predictions and results	
Day-3	Project	Model deployment	
Day-4	Project	Saving model	
Day-5	Project	Implementing user interface for model predictions	
Day-6	Project	Model evaluation and deployment	

WEEKLY REPORT FOR THE SEVENTH WEEK

Objective Of The Activity Done: To apply learned concepts in a real-world scenario by developing a simple Machine Learning project from data preprocessing to model building.

Detailed Report: This week was dedicated to implementing a Machine Learning project. Students selected a problem and dataset, performed data cleaning, and applied suitable Machine Learning algorithms. They trained and tested their models and generated predictions. This hands-on experience helped students understand the complete workflow of a Machine Learning project.

Conclusion:

Students successfully implemented a project, gaining hands-on experience in applying Machine Learning workflows and improving problem-solving skills.

ACTIVITY LOG FOR THE EIGHTH WEEK

Day & Date	Brief description of the daily activity	Learnin g outcome	Person In-charge Signature
Day-1	Documentation	Documentation	
Day-2	Documentation	Documentation	
Day-3	Documentation	Documentation	
Day-4	Documentation	Documentation	
Day-5	Documentation	Documentation	
Day-6	Documentation	Documentation	

WEEKLY REPORT FOR THE EIGHTH WEEK

Objective Of The Activity Done: To develop documentation skills by preparing a structured report explaining the project, methodology, and results.

Detailed Report: During the final week, students focused on documenting their project work. They prepared reports including introduction, objectives, methodology, results, and conclusions. Emphasis was given to presenting the workflow clearly and explaining the outcomes. This week helped students improve their documentation and communication skills, which are important for professional and academic purposes.

Conclusion:

Students were able to clearly document their work, present findings, and summarize their learning, enhancing both technical and communication skills.

CHAPTER 5 : OUTCOMES DESCRIPTION

Describe the work environment you have experienced in terms of people interactions, facilities available and maintenance, clarity of job roles, protocols procedures, processes discipline, time management, harmonious relationships socialization, mutual support and teamwork motivation, space and ventilation, etc.)

People Interactions: A positive work environment encourages open communication, collaboration, and respect among colleagues. People interact in a friendly and professional manner, fostering a sense of community.

Facilities and Maintenance: A well-maintained workspace with proper facilities, such as comfortable seating, ergonomic equipment, clean restrooms, and well-functioning technology, contributes to a conducive work environment.

Clarity of Job Roles: Clearly defined job roles and responsibilities help employees understand their tasks and expectations, reducing confusion and promoting efficiency.

Protocols, Procedures, and Processes: Well-established protocols and procedures ensure that tasks are executed consistently and accurately. Documented processes make it easier for employees to follow best practices.

Discipline and Time Management: A culture of discipline and effective time management helps employees meet deadlines and maintain a productive work pace.

Harmonious Relationships: A positive work environment cultivates harmonious relationships by fostering empathy, active listening, and conflict resolution skills among team members.

Socialization and Teamwork: Opportunities for socialization, team-building activities, and cross-functional collaboration promote a strong sense of teamwork and camaraderie.

Mutual Support: Colleagues support each other's growth and development by sharing knowledge, providing constructive feedback, and offering assistance when needed.

Motivation: An environment that recognizes and rewards achievements, and provides opportunities for professional growth, fosters motivation and commitment among employees.

Space and Ventilation: A well-designed workspace with adequate lighting, proper ventilation, and comfortable seating contributes to the physical well-being of employees.

Describe the real time technical skills you have acquired from of the job-related skills and hands on experience

Technical skills are the improved my specialized knowledge and expertise required to perform specific tasks and use specific tools and programs in real world situations. Diverse technical skills are required in just every field and Industry, from IT & business administration to health Care & Education.

- Anaconda Proficiency
- Basic usage of the Jupyter Notebook was introduced.
- Python Programming for Machine learning.
- Advanced Python Programming like Numpy, Pandas, Matplotlib.
- Machine learning workflow
- Data collection & understanding
- Data Cleaning
- Model Building & evaluation

Describe the managerial skills you have acquired (in terms of planning ,leadership ,team work, behaviour workmanship, productive use of time, weekly improvement in competencies, goal setting , decision making,performance analysis etc..)

Planning: I understood how to create effective plans for projects, tasks, and goals. This includes outlining steps, setting timelines, and considering resource allocation.

Leadership: I understood leadership styles, communication strategies, and ways to motivate and inspire my team. I also understood assisting in conflict resolution and fostering a positive work culture.

Teamwork: I have learned how to offer guidance on building and managing teams, promoting collaboration, and enhancing team dynamics to achieve common goals.

Behavior and Workmanship: I understood behavioral aspects, such as effective communication, active listening, empathy, and professionalism in the workplace.

Productive Use of Time: I can provide tips for time management, prioritization, and delegation to ensure tasks are completed efficiently.

Weekly Improvement in Competencies: I can suggest strategies for continuous learning and improvement, including setting aside time for skill development and staying up-to-date with industry trends.

Goal Setting: I can assist in setting SMART (Specific, Measurable, Achievable, Relevant, Time-bound) goals and tracking progress toward their achievement.

Decision Making: I can explain decision-making processes, including analyzing options, considering pros and cons, and making informed choices based on available data.

Performance Analysis: I can help you understand techniques for evaluating employee performance, providing constructive feedback, and implementing performance improvement plans.

Describe how you could improve your communication skills (in terms of improvement in oral communication, written communication, conversational abates confidence levels while communicating, anxiety management, understanding others getting understood by others, extempore speech, ability to articulate the key points closing the conversation, maintaining niceties and protocols, greeting, thanking appreciating others, etc)

Oral Communication (Text-to-Speech):

Enhance voice synthesis for more natural and expressive speech patterns.
Improve intonation, rhythm, and pacing to sound more human-like.

Written Communication (Text Generation):

Enhance language generation models to produce more coherent, contextually relevant, and engaging text.
Improve grammar, syntax, and vocabulary usage to ensure clearer and more concise writing.

Conversational Abilities:

Develop the ability to initiate and sustain longer and more contextually relevant conversations.
Recognize and respond to conversational cues, such as humor, sarcasm, or empathy.

Confidence Levels and Anxiety Management:

Simulate a confident and assured tone in responses to inspire user confidence.
Avoid appearing overly assertive or hesitant to maintain a balanced conversational tone.

Understanding Others and Being Understood:

Enhance context comprehension to better understand user queries, even in ambiguous situations.
Improve the ability to paraphrase and rephrase responses for better clarity.

Extempore Speech and Articulation:

Develop the capability to generate coherent and well-structured impromptu speeches on various topics.
Improve the clarity and organization of points presented during extemporaneous responses.

Key Point Articulation and Closing Conversations:

Refine the ability to highlight and summarize key points in responses for better understanding.

Develop closing statements that provide a clear conclusion or next steps for the conversation.

Maintaining Niceties and Protocols:

Incorporate polite language and diplomatic phrasing to maintain a courteous tone.

Recognize social and cultural norms to ensure respectful and appropriate interactions.

Greeting, Thanking, and Appreciating Others:

Enhance the ability to greet users warmly and create a positive initial impression.

Improve the naturalness of expressing gratitude and appreciation.

Anxiety Management and Emotional Intelligence:

Simulate responses that demonstrate empathy and emotional intelligence. Recognize and address signs of user frustration or dissatisfaction to mitigate anxiety.

Describe how you could enhance your abilities in group discussions, participation in teams, contribution as a team member, leading a team/activity.

Group

Discussions:

Develop the ability to actively listen and respond to multiple participants in a discussion, simulating a natural flow of conversation.

Recognize and respond to cues indicating someone wants to speak, ensuring equitable participation.

Participation in Teams:

Simulate engagement as a valuable team member by providing relevant insights, suggestions, and constructive feedback during discussions.

Integrate into team discussions seamlessly, respecting turn-taking and avoiding dominating the conversation.

Contribution as a Team Member:

Enhance the ability to collaborate on problem-solving, brainstorming, and decision-making within the team context.

Offer well-considered contributions that demonstrate critical thinking and support the team's goals.

Leading a Team/Activity:

Develop the capacity to guide discussions, set agendas, and facilitate team activities.

Lead by example, demonstrating effective communication, empathy, and conflict resolution skills.

Understanding Group Dynamics:

Improve the ability to read and interpret group dynamics, identifying power structures, decision influencers, and potential conflicts.

Adapt communication style based on group dynamics to maintain a balanced and productive conversation.

Managing Diverse Perspectives:

Enhance the ability to acknowledge and respect diverse viewpoints within the team, promoting inclusivity and open-mindedness.

Address disagreements tactfully while encouraging constructive dialogue.

Task Delegation and Coordination:

Develop the capability to allocate tasks, monitor progress, and ensure coordinated efforts among team members.

Offer guidance and support to team members, assisting in overcoming challenges.

Conflict Resolution:

Enhance skills in identifying and addressing conflicts within the team, promoting a harmonious working environment.

Provide diplomatic and impartial solutions to conflicts while fostering a culture of understanding.

Decision-Making as a Team Leader:

Simulate the ability to guide the team towards consensus-based decisions or make informed judgments when required.

Consider various perspectives and prioritize the team's collective interests.

Continuous Improvement:

Regularly update training data to include a broader range of scenarios, team dynamics, and leadership styles.

Describe the technological developments you have observed and relevant to the subject area of training (focus on digital technologies relevant to your job role)

During the internship, significant technological advancements were observed in the domain of **Machine learning Model Building**, particularly in **Advanced python development** and the foundational programming language **python**.

- python installation and basics.
- Data types variables, type casting in python.
- operators, control statements, loops and conditional statements in python.
- Data structures, strings and functions in python.
- File handling, modules and classes in python.
- Advanced python concepts like Numpy, Pandas, Matplotlib.
- Machine learning workflow
- Data collection, data understanding and data cleaning.
- Model selection and building.
- Model Evaluation and performance.

Student Self Evaluation of the Short-Term Internship

Student Name:	Registration No:	
Term of Internship:	From:	To :
Date of Evaluation:		
Organization Name & Address:		

Please rate your performance in the following areas:

Rating Scale: **Letter grade of CGPA calculation to be provided**

1	Oral communication	1	2	3	4	5
2	Written communication	1	2	3	4	5
3	Proactiveness	1	2	3	4	5
4	Interaction ability with community	1	2	3	4	5
5	Positive Attitude	1	2	3	4	5
6	Self-confidence	1	2	3	4	5
7	Ability to learn	1	2	3	4	5
8	Work Plan and organization	1	2	3	4	5
9	Professionalism	1	2	3	4	5
10	Creativity	1	2	3	4	5

EVALUATION

Internal & External Evaluation for Semester Internship

Objectives:

- Explore career alternatives prior to graduation.
- To assess interests and abilities in the field of study.
- To develop communication, interpersonal and other critical skills in the future job.
- To acquire additional skills required for the world of work.
- To acquire employment contacts leading directly to a full-time job following graduation from college.

Assessment Model:

- There shall be both internal evaluation and external evaluation
- The Faculty Guide assigned is in-charge of the learning activities of the students and for the comprehensive and continuous assessment of the students.
- The assessment is to be conducted for 200 marks. Internal Evaluation for 50 marks and External Evaluation for 150 marks
- The number of credits assigned is 12. Later the marks shall be converted into grades and grade points to include finally in the SGPA and CGPA.
- The weightings for Internal Evaluation shall be:
 - Activity Log 10 marks
 - Internship Evaluation 30 marks
 - Oral Presentation 10 marks
- The weightings for External Evaluation shall be:
 - Internship Evaluation 100 marks
 - Viva-Voce 50 marks
- The External Evaluation shall be conducted by an Evaluation Committee composed of the Principal, Faculty Guide, Internal Expert and External Expert nominated by the affiliating University. The Evaluation Committee shall also consider the grading given by the Supervisor of the Intern Organization.
- Activity Log is the record of the day-to-day activities. The Activity Log is assessed on an individual basis, thus allowing for individual members within groups to be assessed this way. The assessment will take into consideration

the individual student's involvement in the assigned work.

- While evaluating the student's Activity Log, the following shall be considered -
 - a. The individual student's effort and commitment.
 - b. The originality and quality of the work produced by the individual student.
 - c. The student's integration and co-operation with the work assigned.
 - d. The completeness of the Activity Log.
- The Internship Evaluation shall include the following components and based on Weekly Reports and Outcomes Description
 - a. Description of the Work Environment.
 - b. Real Time Technical Skills acquired.
 - c. Managerial Skills acquired.
 - d. Improvement of Communication Skills.
 - e. Team Dynamics
 - f. Technological Developments recorded.
